Valuing (and funding) housing infrastructure

Dr Nicholas Falk, Founding Director, URBED www.urbed.coop postcardfromthefuture.wordpress.com

Infrastructure affects values

- Location, location and location Harold Samuel
 - The lack of house building enabling infrastructure. It is no accident that investment in housing output in the UK is among the lowest in the developed world -Local Growth White Paper 2010
 - But it should be obvious that mere abstinence is not enough by itself to build cities or drain fens – John Maynard Keynes 1926

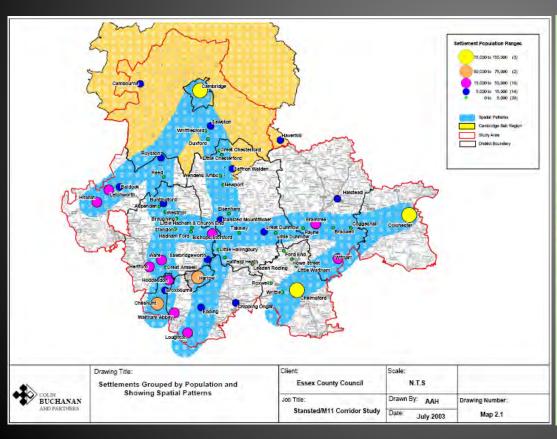

Values are changing

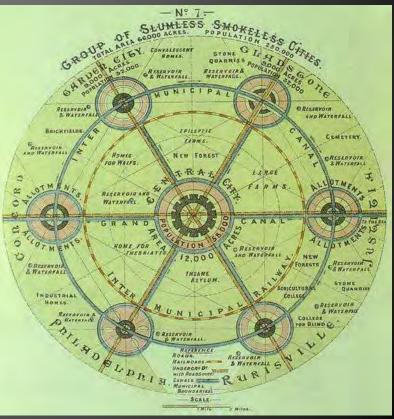

- Protecting the past (early C.20th)
- Meeting present needs (post war)
- Balancing future priorities (C.21st)

Growth follows infrastructure

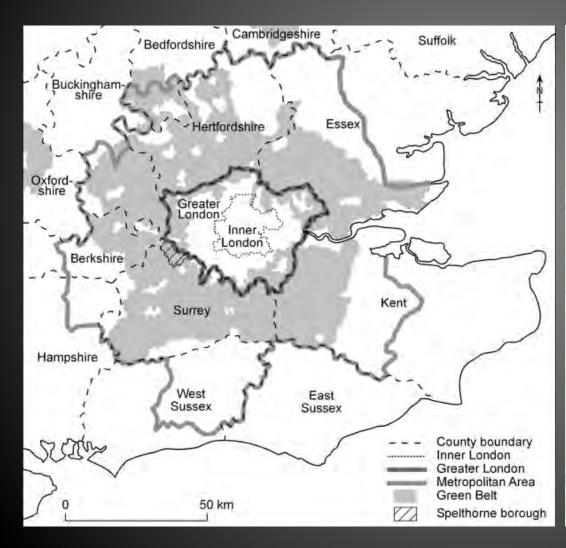

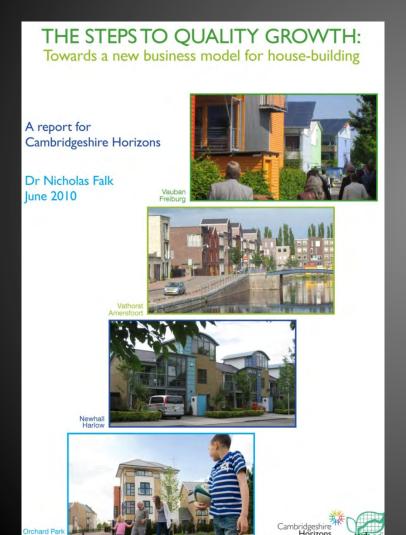

Growth may take many forms

Steps to growth...

1. Growth in the right places

2. Sustainable infrastructure

3. Balanced communities and Stewardship

Growth in the right places: Brighton's New England Quarter - LEP's?

Growth in the right places:

Manchester's Ancoats and New Islington

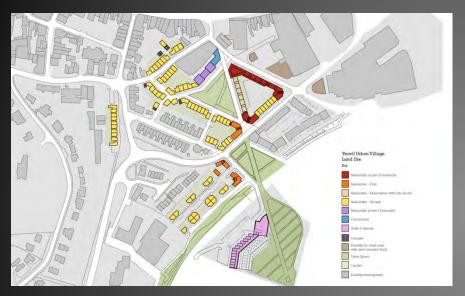

Growth in the right places:

Yeovil Urban Village

Growth in the right places:

Brentford Lock West

Sustainable Infrastructure:

Joint Venture (Derwenthorpe, York)

Sustainable Infrastructure:

Land as equity/City Deal (Barton, Oxford)

Sustainable Infrastructure:

Revolving funds EIB/CIL (Vathorst, NL)

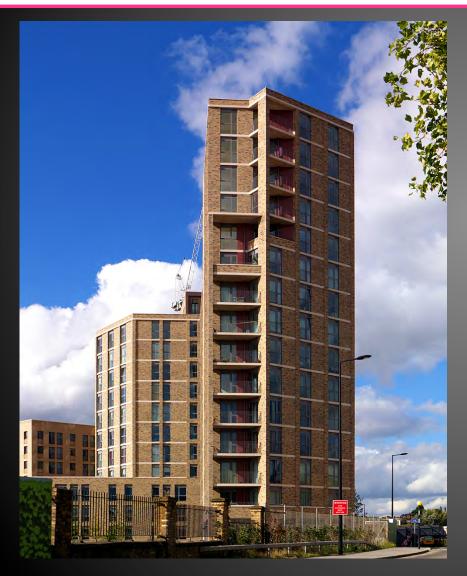

Community Trusts (Lightmoor, Telford)

Public enterprise (Camden, London)

Public enterprise (Paris Rive Gauche)

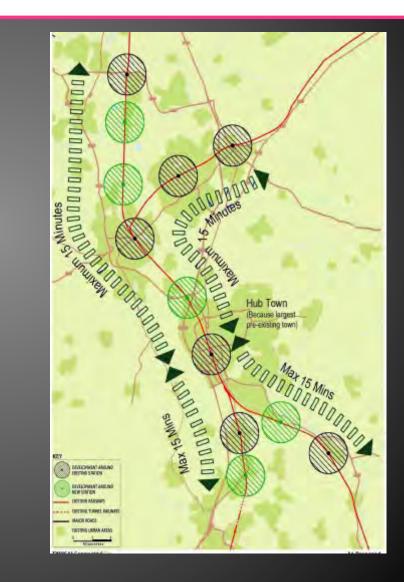

Connected Cities

Future Scenarios:

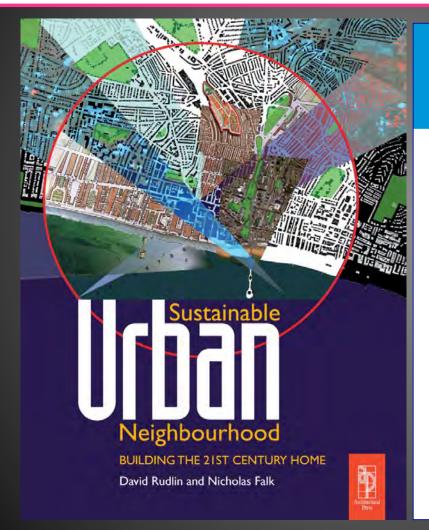

What do we want?

Want to know more?

Sustainable urban neighbourhoods

Building communities that last

February 2012

Nicholas Falk and Michael Carley

This report examines what does and doesn't work in building new communities and shows how to build more homes, better neighbourhoods and stronger communities.

Bullding new communities that are physically and socially sustainable is a major challenge if we are to resolve the nation's housing orisis and avoid repeating past mistakes. This report looks at the design of sustainable urban neighbourhoods, it examines how local partners can work better together to foster localism and realise the aspirations of the National Planning Policy Framework and concludes with recommendations for government and other organisations.

The report, which is based on learning from 13 new communities in England:

- identifies the characteristics of a sustainable urban neighbourhood;
- stresses the importance of a large spatial planning framework to underpin community building;
- shows the importance of local vision and leadership; and
- highlights good practice in design, local governance, community facilities, management of public space, retail provision and long-term stewardship.
