Valid for cohorts	From 2022/3

Admissions requirements

There are standard minimum entry requirements for all postgraduate courses. Students are advised to check the standard requirements for the most up-to-date information. For most courses a decision will be made on the basis of your application form alone. However, for some courses the selection process may include an interview to demonstrate your strengths in addition to any formal entry requirements. More information can be found here: <https://www.westminster.ac.uk/courses/postgraduate/how-to-apply>.

Aims of the programme

In accordance with the Criminology subject area benchmark statement (QAA 2019), the MA Criminology degree is designed to develop students' knowledge and critical understanding of criminology as an interdisciplinary subject that incorporates legal, political and psychological as well as social scientific approaches to the study of crime, deviance, criminal and social justice, and encompasses all social harms that are considered deviant, criminal or an abuse of human rights, whether perpetrated by individuals, states, corporations or criminalised groups, and whether committed in private, public or cyber spaces.

The programme is also designed to develop students' understanding of criminology as an interdisciplinary subject area that incorporates legal, political and psychological as well as social scientific approaches to the study of crime, deviance, criminal and social justice, as reflected in section 8.1 of QAA (2019).

The course content is organised around two themes: global criminology and critical criminology. Global criminology is a relatively new and growing area of criminology that is at the forefront of developments in postcolonial, decolonial and southern theory. It is a specialist area of critical criminology, which explores issues of crime and justice within the context of power relations and structural inequalities – e.g., class, gender, nationality, ethnicity, disability, age and sexuality –, and is longer established. The programme also includes a year-long research methods and dissertation core module in which students complete empirical research on a critical and/or global criminology issue of their choice.

Specialised option modules are offered in the two main areas of global criminology: comparative criminology (that studies convergences and divergences in crime and justice between nations and regions) and transnational criminology (that explores the nature of organised, state and corporate crimes and responses to organised crimes that cross borders). An option module is also offered in convict criminology, a second emerging area of critical criminology that focuses on the knowledge and standpoints of educated prisoners and former prisoners.

Employment and further study opportunities

Today's organisations need graduates with both good degrees and skills relevant to the workplace, i.e. employability skills. The University of Westminster is committed to developing employable graduates by ensuring that:

- Career development skills are embedded in all courses
- Opportunities for part-time work, placements and work-related learning activities are widely available to students
- Staff continue to widen and strengthen the University's links with employers in all sectors, involving them in curriculum design and encouraging their participation in other aspects of the University's career education and guidance provision
- Staff are provided with up-to-date data on labour market trends and employers' requirements, which will inform the service delivered to students.

Completion of the course opens up a broad range of potential national and international career opportunities in the field of criminal justice, including third sector human rights, victim and offender support organisations, research institutes and managerial positions in statutory agencies like police, probation, and prison services. The academic knowledge and research skills that students gain by completing the course also puts them in a strong position to undertake higher level study such as a PhD.

Employability is embedded within the course as well as the teaching, learning and assessment strategies utilised on individual modules. The course learning outcomes are designed to contribute to each of the key graduate attributes identified in the University Education Strategy. For instance, students' entrepreneurial and communication skills are developed through their experiences of group research and group presentations, while their skills of critical and creative thinking are developed by their reflecting on feedback provided through formative assessments. With its basis in Critical and Global Criminology, the course is also specifically designed to encourage students to become more socially and ethically aware, and international in outlook.

What will you be expected to achieve?

Course learning outcomes

Learning outcomes are statements of what successful students have achieved as the result of learning. These threshold statements of achievement and are linked to the knowledge, understanding and skills that a student will have gained on successfully completing a course.

Level 7 course learning outcomes: upon completion of Level 7 you will be able to:

- 001 Systematically describe and compare key concepts and theoretical approaches across a range of specialist areas of global and critical criminological study. (KU CS)
- 002 Demonstrate understanding of the complexity of competing criminological explanations in order to critically examine and compare national and transnational crimes, criminal justice policies and practices. (KU CS)
- 003 Select and synthesise appropriate materials from a range of national and international academic, governmental, and civil society criminal justice sources in order to develop reasoned arguments and critical judgement. (KU KTS)
- 004 Communicate to an advanced level in speech and writing on a variety of topics in criminology. (KTS)
- 005 Share their own knowledge and expertise with confidence. (KTS)
- 006 Work independently and demonstrate intellectual originality. (KTS SS)
- 007 Take responsibility for collaborating with the course team and other learners on the programme in supervised projects and independent group work. (KTS)
- 008 Critically evaluate their own work and the work of others in relation to their understanding and application of criminological knowledge. (KTS SS)
- 009 Reflect on constructive feedback to strategically enhance their own learning. (KTS)
- 010 Design and complete a substantial, specialist and original empirical research project. (KU KTS SS CS)

How will you learn?

Learning methods

In line with the University Education Strategy, the MA Criminology course team is committed to problem-focused learning and student-centred inquiry. As such, learning activities are designed to be practical and inclusive. The MA Criminology course make particular use of three specific learning methods: case-study based learning (in which, e.g., students analyse major incidences of crime), action-based learning (where, e.g., students compare and evaluate potential solutions to particular types of crime), and collaborative peer to peer learning (including, e.g., group research, group classroom discussion and group presentations).

In accordance with our commitment to student-centred inquiry, the course team also aim to facilitate a classroom atmosphere in which students feel comfortable to share their own knowledge and expertise, maximising the wide range of experiences our diverse and international student body, and encouraging students to take increasing responsibility for their own learning with appropriate support.

Several modules integrate technologies to support student learning and help develop their digital capabilities. Depending on the module, these include data analysis and data encryption software, and team collaboration tools and software.

Teaching methods

Teaching is organised to help students meet the learning outcomes of the course as well as individual modules, and to fulfil their potential as valued members of the national and international community. In addition to our focus on student-centred learning, all of our modules are delivered by staff who are themselves actively researching the subject matter. In line with University policy, we are also committed to involving students in staff research where possible.

Lectures are used to provide a common foundation of learning to all students and are designed to enhance understanding of the main themes and debates introduced in core module readings. Seminars are interactive and involve individual and group activities designed to allow students to develop their communication skills, share and explore their knowledge and understanding with their peers. Workshops are student-led and are designed to further solidify understanding through requiring them to complete independent research. Tutorials provide opportunities for students to discuss their progress and receive formative feedback on their performance in coursework.

Assessment methods

In accordance with the course team's commitment to problem-focused learning inquiry, modules are assessed by authentic as well as traditional coursework assessments. As such, most assessments aim to test students' ability to apply and contextualise their knowledge and understanding gained on the course to real-world examples of crime and justice. The course team make use of a variety of coursework assessment types, including essays, reports, critical reviews of journal articles or research papers, group presentations, and a dissertation that requires students to design and deliver an empirical research project.

In line with our commitment to student-centred inquiry, most modules also include formative as well as summative coursework assessments. As part of the assessment process, the course team provide specific feedback on student progress and how they might further develop their knowledge and understanding of criminology, their abilities to conduct individual and group research, and their skills of critical analysis.

Graduate Attribute	Evident in Course Outcomes
Critical and creative thinker	006, 007, 008, 009, 010
Literate and effective communicator	003, 004, 005, 008, 010
Entrepreneurial	006, 007, 009, 010
Global in outlook and engaged in communities	001, 002, 003
Socially, ethically and environmentally aware	001, 002, 003, 010

Course Structure

This section shows the core and option modules available as part of the course and their credit value. Full-time Postgraduate students study 180 credits per year. Additional free text information on the choices may also be included, for example where students must choose one of two modules.. Course structures can be subject to change each academic year following feedback from a variety of sources.

Modules

Level 7

COURSE STRUCTURE

Postgraduate students study 180 credits a year. To complete this programme, students take 140 credits of core modules and 40 credits of option modules.

Core modules

- 7CRIM001W Global Criminology (20 credits) (semester one)
- 7CRIM007W Critical Criminology (20 Credits) (semester one)
- 7CRIM004W Research Methods and Dissertation (60 credits) (year-long)
- 7CRIM003W Global Policing and Transnational Security (20 credits) (semester 2)
- 7CRIM002W Global Prisons (20 credits) (semester 2)

Option modules

Two option modules from the list below. Students choose one option module in the first semester and one option module in the second semester.

- 7CRIM008W Global Gangs (20 credits) (semester 1)
- 7CRIM006W Privatising Justice (20 credits) (semester 1)
- 7CRIM005W State Crimes and Radicalisation in the 'War on Terror' (20 credits) (semester 2)
- 7CRIM009W Convict Criminology (20 credits) (semester 2)

Module Code	Module Title	Status	PT Year (where applicable)	UK credit	ECTS
<i>no modules for this level</i>					

Please note: Not all option modules will necessarily be offered in any one year. In addition, timetabling and limited spaces may mean you cannot register for your first choice of option modules.

Professional body accreditation or other external references

This degree is not accredited by a professional body

Course management

The course leader is Sacha Darke. The Head of School is Dibyesh Anand

Academic regulations

The current Handbook of Academic Regulations is available at westminster.ac.uk/academic-regulations.

Course specific regulations apply to some courses.

Academic Support

Upon arrival, an induction programme will introduce you to the staff responsible for the course, the campus on which you will be studying, the Library and IT facilities, additional support available and to your Campus Registry. You will be provided with the Course Handbook, which provides detailed information about the course. Each course has a course

leader or Director of Studies. All students enrolled on a full-time course and part time students registered for more than 60 credits a year have a personal tutor, who provides advice and guidance on academic matters. The University uses a Virtual Learning Environment called Blackboard where students access their course materials, and can communicate and collaborate with staff and other students. Further information on Blackboard can be found at <https://www.westminster.ac.uk/current-students/studies/your-student-journey/when-you-arrive/blackboard>

The Academic Learning Development Centre supports students in developing the skills required for higher education. As well as online resources in Blackboard, students have the opportunity to attend Study Skills workshops and one to one appointments. Further information on the Academic Learning Development Centre can be found at [westminster.ac.uk/academic-learning-development](https://www.westminster.ac.uk/academic-learning-development).

Learning support includes four libraries, each holding a collection of resources related to the subjects taught at that site. Students can search the entire library collection online through the Library Search service to find and reserve printed books, and access electronic resources (databases, e-journals, e-books). Students can choose to study in the libraries, which have areas for silent and group study, desktop computers, laptops for loan, photocopying and printing services. They can also choose from several computer rooms at each campus where desktop computers are available with the general and specialist software that supports the courses taught in their College. Students can also securely connect their own laptops and mobile devices to the University wireless network.

Support Services

The University of Westminster Student and Academic Services department provide advice and guidance on accommodation, financial and legal matters, personal counselling, health and disability issues, careers, specialist advice for international students and the chaplaincy providing multi-faith guidance. Further information on the advice available to students can be found at <https://www.westminster.ac.uk/student-advice>

The University of Westminster Students' Union also provides a range of facilities to support students during their time at the University. Further information on UWSU can be found at <https://www.westminster.ac.uk/students-union>

How do we ensure the quality of our courses and continuous improvement?

The course was initially approved by a University Validation Panel. University Panels normally include internal peers from the University, academic(s) from another university, a representative from industry and a Student Advisor.

The course is also monitored each year by the College to ensure it is running effectively and that issues which might affect the student experience have been appropriately addressed. Staff will consider evidence about the course, including the evidence of student surveys, student progression and achievement and reports from external examiners, in order to evaluate the effectiveness of the course and make changes where necessary.

A Course revalidation takes place periodically to ensure that the curriculum is up-to-date and that the skills gained on the course continue to be relevant to employers. Students meet with revalidation panels to provide feedback on their experiences. Student feedback from previous years is also part of the evidence used to assess how the course has been running.

How do we act on student feedback?

Student feedback is important to the University and student views are taken seriously. Student feedback is gathered in a variety of ways.

- Through student engagement activities at Course/Module level, students have the opportunity to express their voice in the running of their course. Course representatives are elected to expressly represent the views of their peers. The University and the Students' Union work together to provide a full induction to the role of the course representatives.
- There are also School Representatives appointed jointly by the University and the Students' Union who meet with senior School staff to discuss wider issues affecting student experience across the School. Student representatives are also represented on key College and University committees.;
- All students are invited to complete a questionnaire before the end of each module. The feedback from this will inform the module leader on the effectiveness of the module and highlight areas that could be enhanced.
- Final year Undergraduate students will be asked to complete the National Student Survey which helps to inform the national university league tables.

This programme specification provides a concise summary of the main features of the course and the learning outcomes that a student might reasonably be expected to achieve and demonstrate, if they take full advantage of the learning opportunities that are provided. This specification is supplemented by the Course Handbook, Module proforma and

Module Handbooks provided to students. Copyright in this document belongs to the University of Westminster. All rights are reserved. Additional Details

All of the core and option modules are designed to be collaborative and culturally sensitive, in accordance with the University of Westminster's (2020) Equality, Diversity and Inclusion policy, as reflected in the School of Social Sciences' 2021 Inclusion and Diversity (where it is stated, "Our commitment to diversify and decolonise the curriculum and teaching practices in the School of Social Sciences is aimed at challenging prejudices that exist in the societies, celebrating plurality of identities and perspectives, and empowering our students and colleagues to explore their full potential." As such, the course team aspire to include a variety of historical and contemporary criminological issues, theoretical approaches and source materials, in recognition of the continuing legacies of colonialism and western domination in knowledge production. Modules are refined and developed year on year in consultation with students. At programme-level, students are invited to participate in a Criminology Decolonial Reading and Curriculum Development Group. The course team are further committed to enabling a supportive and empowering classroom environment which is equitable, diverse and inclusive, is based on mutual respect and trust, and in which harassment and discrimination are neither tolerated nor acceptable. Underpinned by a commitment to an inclusive pedagogy, the course team will ensure the transparency and fluency of course content and delivery for all students.

Regular meetings are also convened between peer-appointed student representatives and module leaders to discuss broader programme-level learning and teaching-related issues like timetabling, dissertation supervision and library resources.
