Programme Specification

Course record information

Name and level of final award	Master of Science - International Development Management The award is Bologna FQ-EHEA second cycle degree or diploma compatible		
Name and level of intermediate awards	Postgraduate Diploma (Pg Dip) - International Development Management Postgraduate Certificate (Pg Cert) - International Development Management		
Awarding body/institution	University of Westminster		
Teaching institution	University of Westminster		
Status of awarding body/institution	Recognised Body		
Location of delivery	Primary: Central London		
Language of delivery and assessment	English		
QAA subject benchmarking group(s)	N/A		
Professional statutory or regulatory body	N/A		
Westminster course title, mode of attendance and standard length	MSc International Development Management FT, Full-time, September or January start - 1 year standard length		
Valid for cohorts	From 2024/5		

Admissions requirements

There are standard minimum entry requirements for all postgraduate courses. Students are advised to check the standard requirements for the most up-to-date information. For most courses a decision will be made on the basis of your application form alone. However, for some courses the selection process may include an interview to demonstrate your strengths in addition to any formal entry requirements. More information can be found here: https://www.westminster.ac.uk/courses/postgraduate/how-to-apply.

Aims of the programme

The MSc International Development Management course aims to prepare graduates for a career in Development Management with an international organisation, a nongovernmental body or a government development agency.

Specifically, the course aims to:

- 1. Develop students' in-depth knowledge of relevant development theory and practice, in an international context, and to facilitate an awareness of the context in which this body of knowledge has emerged.
- 2. Provide students with the opportunity to acquire the expertise necessary for the framing and diagnosis of complex development issues and problems and to employ appropriate management techniques to resolve these.
- 3. To enhance students' capacity to critically evaluate national and international economic, political and social factors affecting the development policy environment.
- 4. To develop students' management competences and the ability to apply a range of management techniques in a development context.
- 5. To provide the opportunity for students to develop a specialist expertise in a particular aspect of development management through in-depth theoretical or empirical research and analysis.

Employment and further study opportunities

Today's organisations need graduates with both good degrees and skills relevant to the workplace, i.e. employability skills. The University of Westminster is committed to developing employable graduates by ensuring that:

- Career development skills are embedded in all courses
- Opportunities for part-time work, placements and work-related learning activities are widely available to students
- Staff continue to widen and strengthen the University's links with employers in all sectors, involving them in curriculum design and encouraging their participation in other aspects of the University's career education and guidance provision
- Staff are provided with up-to-date data on labour market trends and employers' requirements, which will inform the service delivered to students.

The MSc IDM is very much aimed at interface between development theory and practice, combining rigorous academic study with the policy insights offered by development practitioners. As a result, students who have successfully completed the MSc IDM course will be equipped to work in a variety of professional roles in a development context either within international, national or local government, or other public sector organisations, or non-government organisations.

Recent experience shows that it is also becoming increasingly possible for graduates of the MSc IDM programme to be self-employed as Development Consultants, working for multinational organisations in a variety of capacities. Students would be able to draw on their development management skills and link this with sound project management expertise developed on the programme.

Following registration on the MSc IDM programme, students are encouraged to register as members of the Development Studies Association (DSA), and Devex (the world's largest community of International Development Experts and Professionals). Although these organisations do not provide professional accreditation as such, they offer platforms for networking and the sharing of research materials which are invaluable for success on the course and for future career development after graduation.

As such, graduates of the MSc IDM programme would be able to network freely with their professional counterparts across the globe, and remain at the forefront of their profession even after graduation.

In addition to these opportunities, eligible students could develop their skills and knowledge further by embarking on a field-based work placement programme with an NGO during their holiday period. The School will facilitate this by regularly placing details of placement vacancies and contact links of appropriate organisations on the Blackboard.

The successful completion of the MSc IDM will also enable graduates to pursue a research degree (e.g. M.Phil. or a PhD) in relevant area, if they so desire.

Course Learning Outcomes

For the MSc IDM programme, these threshold statements of achievement are linked to the knowledge, understanding and skills that a student will have gained on successful completion of the programme.

The special feature of the MSc IDM programme is the unique blend of theoretical and practical knowledge and the skills base that it develops. Students completing the course will have acquired knowledge of key development theories and issues, strongly underpinned by good theoretical and practical skills in the management area.

The course therefore facilitates and enables students to develop problem identification skills and the ability to apply critical analysis to international business and economic processes within a development context. It also equips them with the theoretical and practical skills to put forward solutions to a range of relevant problems. The course also develops students' analytical and methodological skills and enables them to apply these in different policy environments. In effect, the programme engenders critical thinking skills amongst the students, and challenges them to think laterally and creatively. These outcomes are classified into three categories namely: knowledge and understanding skills, specific skills, and key transferable skills.

What will you be expected to achieve?

Course learning outcomes

Learning outcomes are statements on what successful students have achieved as the result of learning.

These are threshold statements of achievement the learning outcomes broadly fall into four categories:

The overall knowledge and understanding you will gain from your course (KU)

Graduate attributes are characteristics that you will have developed during the duration of your course (GA)

Professional and personal practice learning outcomes are specific skills that you will be expected to have gained on successful completion of the course (PPP)

Key transferable skills that you will be expected to have gained on successful completion of the course. (KTS)

Level 7 course learning outcomes: upon completion of Level 7 you will be able to:

- KNU1 Global and regional development issues, including an appreciation of their scope and policy implications. (KU)
- KNU2 Project management techniques and procedures for conducting diagnostic appraisal of development interventions and the technical capability to proffer workable and sustainable solutions. (KU)
- KNU3 The role and influence of global development stakeholders in fostering sustainable development and demonstrate the ability to access and utilise their regional and global expertise. (KU)
- KNU4 A specialist area of development management, based on in-depth empirical or conceptual research. (KU)
- KTS1 Solve complex problems in a systematic way, informed by a range of relevant knowledge, tools and techniques. (KTS)
- KTS2 Act autonomously in planning and implementing tasks in a professional setting. (KTS)
- KTS3 Reflect on personal performance and planning for personal development. (KTS)
- KTS4 Apply interpersonal, group-working and leadership skills to enhance the performance of oneself and others. (
 KTS)
- KTS5 Engage in a range of academic communication processes, both oral and written. (KTS)
- SS1 Critically review relevant development theory and practice, and conduct diagnostic and strategic analyses of development management issues in an international context. (SS)
- SS2 Apply relevant management techniques in the diagnosis of development problems and in the identification of solutions to these problems. (SS)
- SS3 Deploy a range of project management methods necessary to operate as a development specialist within national and international contexts. (SS)
- SS4 Conduct a lucid and substantive piece of research within the area of international development management, through the application of appropriate research methodologies and data analysis, be able to communicate findings in a manner that is coherent and consistent. (SS)
- SS5 Appraise and apply various techniques of economic and financial analysis to validate initiation of a development intervention, as well as its sustainability. (SS)
- SS6 Constructively engage with stakeholders at various stages and levels of a development intervention, and to help build outcomes that are inclusive and deliverable. (SS)
- SS7 Critically evaluate developmental projects with a view to identifying causes of failure and recommending appropriate corrective measures. (SS)

How will you learn?

Learning methods

The programme's learning strategy engenders a student-centered learning approach through active interaction amongst students, with tutors playing the role offacilitators. In line with this principle, students are encouraged to be self-motivated and independent learners, with the ability to reflect in an atmosphere in which intellectual freedom is engendered and nurtured.

The driving aim of the programme is to offer an appropriate blend of theory and practice. As such, students will be expected to focus on development of the knowledge, and analytical and appraisal skills necessary for an international development manager. The emphasis will therefore be on acquiring and developing a range of both theoretical and practical skills. As well as utilising in-house research and practical experience, the course will draw upon business, government and non- government experts, to provide specialist knowledge and insights where necessary. As such, problem-based learning approaches – using complex, 'real-life' development problems - feature prominently in several modules on the programme. For instance, in the core module Current Issues in International Development, in addition to guest lectures from international development practitioners, small teams of students will be required to investigate a contemporary development issue and to present their findings, using a range of media. In the Managing Development Interventions module, the emphasis is on the analysis of specific projects or development programs or initiatives, using policy documents from the IMF, World Bank and other international agencies and organisations.

In addition to expert-led learning and teaching, the students on the MSc IDM programme will be expected to undertake guided independent study to broaden their knowledge base, complete other formative learning activities and undertake independent research for their project. Students on the MSc IDM will be encouraged to read widely and keep abreast of contemporary International Development issues.

The project module will enable the students to develop a specialist area within the International Development Management field, by requiring them to explore apractical development issue focused on a region (or regions) of their choice. Each of the students will be allocated a project supervisor who will facilitate the development of the student's specialist skills and guide them through the research and writing process.

Teaching methods

The Course Team uses a variety of approaches to teaching, including technology- enhanced and blending learning methods, including the following:

- Lectures
- Tutorials
- · Small group workshops
- · In-class discussions
- Student-led presentations
- Case Studies

In each of the above approaches, specific steps are taken to stimulate collaborative learning and active participation by the students. Specialist guest speakers, including field practitioners, are invited to lead workshops and in-class discussions. This further enhances the teaching activities on the programme and offers useful practical perspectives. Students on the programme will, in addition, have access to an on-line Blackboard VLE system. There they will be able to access the material posted on the various module sites which will include module handbooks, lecture slides, seminar activities and a wide range of supporting information. The course site will provide information on activities and events available to students. The Blackboard site therefore supplements classroom delivery and offers relevant and regular sources of information for the students.

Assessment methods

The MSc IDM programme employs a wide variety of formative and summative assessment methods, including group presentations, in-class tests, essays, projects and final examinations, amongst others. In all cases, assessment methods are selected and combined to validate the achievement of the learning outcomes and the acquisition of knowledge and skills as specified within the individual modules and at course level.

Where a group of assessment method is considered appropriate, the programme offers a mechanism for assessing individual contributions from group members, in order to discourage 'free riding'. The Course Team works collaboratively to ensure the clarity of marking criteria, consistency of the marking process and timeliness of assessment feedback. The Team also monitors the detail and clarity of assessment feedback as well as the evenness of the assessment workload.

Methods of assessment

- Development Economics & Policy [7ECON002W]: 1 exam and 2 essays
- Current Issues in International Development [7DVST001W]: 1 exam and 2 group presentations
- Managing Data [7ECON009W]: 1 report
- Research Methods [7ECON014W]: Project/Proposal
- International Development Finance [7DVST002W]: 1 exam and 1 essay
- Managing Development Interventions [7DVST004W]: 1 essay and 1 group presentation and briefing paper
- International Development Management Project [7DVST005W]: Project/Proposal
- Sustainable Energy Policy [7ECON013W]: 1 Report

Course Structure

This section shows the core and option modules available as part of the course and their credit value. Full-time Postgraduate students study 180 credits per year. Additional free text information on the choices may also be included, for example where students must choose one of two modules.. Course structures can be subject to change each academic year following feedback from a variety of sources.

Modules

Level 7

Elective listed below is one option module (a student may take any Level 7 module from across the university, subject to the approval of the course leader).

Module Code	Module Title	Status	UK credit	ECTS
7DVST001W	Current Issues in International Development	Core	20	10
7ECON002W	Development Economics and Policy	Core	20	10
7DVST002W	ST002W International Development Finance		20	10
7DVST005W	/ST005W International Development Management Project		20	10
7ECON009W Managing Data		Core	20	10
7DVST004W Managing Development Interventions		Core	20	10
7ECON014W Research Methods		Core	20	10
7ECON013W	CON013W Sustainable Energy Policy		20	10
		Elective	20	10

Please note: Not all option modules will necessarily be offered in any one year. In addition, timetabling and limited spaces may mean you cannot register for your first choice of option modules.

Professional body accreditation or other external references

Course management

The Course is managed by the Course Leader. The course is delivered by a team of experienced module leaders, who constitute the Course Team and who work together to ensure that the course is delivered in a coherent and consistent manner. The Head of College holds overall responsibility for the course and for other courses run by Westminster Business School.

The Associate Head of Westminster Business School (Education and Students) holds responsibility for the overall quality and delivery of the educational process.

The Head of the School of Organisations, Economy and Society is responsible for monitoring academic quality and organising assessment procedures for those modules falling under the School's Subject Board and courses at Conferment Boards.

The Course Leader has responsibility for the academic integrity of the programme. This includes the everyday management of the course, development of the curriculum, and ensuring the delivery in terms of quality control and equivalence of experience for course participants.

For purposes of monitoring academic quality and organising assessment under an appropriate Conferment Board, each postgraduate course is hosted by one of the School's four academic departments. This course is assigned to the School of Organisations, Economy and Society.

Academic regulations

The current Handbook of Academic Regulations is available at westminster.ac.uk/academic-regulations.

Course specific regulations apply to some courses.

Academic Support

Upon arrival, an induction programme will introduce you to the staff responsible for the course, the campus on which you will be studying, the Library and IT facilities, additional support available and to your Campus Registry. You will be provided with the Course Handbook, which provides detailed information about the course. Each course has a course leader or Director of Studies. All students enrolled on a full-time course and part time students registered for more than 60 credits a year have a personal tutor, who provides advice and guidance on academic matters. The University uses a Virtual Learning Environment called Blackboard where students access their course materials, and can communicate and collaborate with staff and other students. Further information on Blackboard can be found at https://www.westminster.ac.uk/current-students/studies/your-student-journey/when-you-arrive/blackboard

The Academic Learning Development Centre supports students in developing the skills required for higher education. As well as online resources in Blackboard, students have the opportunity to attend Study Skills workshops and one to one appointments. Further information on the Academic Learning Development Centre can be found at westminster.ac.uk/academic-learning-development.

Learning support includes four libraries, each holding a collection of resources related to the subjects taught at that site. Students1 can search the entire library collection online through the Library Search service to find and reserve printed books, and access electronic resources (databases, e-journals, e-books). Students can choose to study in the libraries, which have areas for silent and group study, desktop computers, laptops for loan, photocopying and printing services. They can also choose from several computer rooms at each campus where desktop computers are available with the general and specialist software that supports the courses taught in their College. Students can also securely connect their own laptops and mobile devices to the University wireless network.

Support Services

The University of Westminster Student and Academic Services department provide advice and guidance on accommodation, financial and legal matters, personal counselling, health and disability issues, careers, specialist advice for international students and the chaplaincy providing multi-faith guidance. Further information on the advice available to students can be found at https://www.westminster.ac.uk/student-advice

The University of Westminster Students' Union also provides a range of facilities to support students during their time at the University. Further information on UWSU can be found at https://www.westminster.ac.uk/students-union

How do we ensure the quality of our courses and continuous improvement?

The course was initially approved by a University Validation Panel. University Panels normally include internal peers from the University, academic(s) from another university, a representative from industry and a Student Advisor.

The course is also monitored each year by the College to ensure it is running effectively and that issues which might affect the student experience have been appropriately addressed. Staff will consider evidence about the course, including the evidence of student surveys, student progression and achievement and reports from external examiners, in order to evaluate the effectiveness of the course and make changes where necessary.

A Course revalidation takes place periodically to ensure that the curriculum is up-to-date and that the skills gained on the course continue to be relevant to employers. Students meet with revalidation panels to provide feedback on their experiences. Student feedback from previous years is also part of the evidence used to assess how the course has been running.

How do we act on student feedback?

Student feedback is important to the University and student views are taken seriously. Student feedback is gathered in a variety of ways.

- Through student engagement activities at Course/Module level, students have the opportunity to express their voice
 in the running of their course. Course representatives are elected to expressly represent the views of their peers.
 The University and the Students' Union work together to provide a full induction to the role of the course
 representatives.
- There are also School Representatives appointed jointly by the University and the Students' Union who meet with senior School staff to discuss wider issues affecting student experience across the School. Student representatives are also represented on key College and University committees.;
- All students are invited to complete a questionnaire before the end of each module. The feedback from this will inform the module leader on the effectiveness of the module and highlight areas that could be enhanced.
- Final year Undergraduate students will be asked to complete the National Student Survey which helps to inform the national university league tables.

This programme specification provides a concise summary of the main features of the course and the learning outcomes that a student might reasonably be expected to achieve and demonstrate, if they take full advantage of the learning opportunities that are provided. This specification is supplemented by the Course Handbook, Module proforma and Module Handbooks provided to students. Copyright in this document belongs to the University of Westminster.
