Admissions requirements

There are standard minimum entry requirements for all postgraduate courses. Students are advised to check the standard requirements for the most up-to-date information.

For most courses a decision will be made on the basis of your application form alone. However, for some courses the selection process may include an interview to demonstrate your strengths in addition to any formal entry requirements.

More information can be found here: westminster.ac.uk/courses/postgraduate/how-to-apply

Aims of the course

The Postgraduate Diploma Professional Practice in Architecture has been designed to prepare postgraduate Architectural students with exemption from the RIBA Parts 1 and 2 Examinations for the final RIBA Part 3 Examination.

Employment and further study opportunities

Today’s organisations need graduates with both good degrees and skills relevant to the workplace, i.e. employability skills. The University of Westminster is committed to developing employable graduates by ensuring that:

- Career development skills are embedded in all courses
- Opportunities for part-time work, placements and work-related learning activities are widely available to students
- Staff continue to widen and strengthen the University’s links with employers in all sectors, involving them in curriculum design and encouraging their participation in other aspects of the University’s career education and guidance provision
- Staff are provided with up-to-date data on labour market trends and employers’ requirements, which will inform the service delivered to students.
- The Diploma in Professional Practice in Architecture is a professional qualification leading to registration as an Architect and professional membership. Students who have successfully completed the course have obtained senior positions in architectural practice, taken more responsibility in architectural practice and used the qualification to develop their own architectural practice and also work overseas. Former students have also developed a specialism in Construction Law.
- The Diploma may also form a platform for continuing study in academia and research and may lead to study for an MPhil/PhD degree.

Course learning outcomes

Learning outcomes are statements on what successful students have achieved as the result of learning. These threshold statements of achievement and are linked to the knowledge, understanding and skills that a student will have gained on successfully completing a course.

The Learning Outcomes for the Course are designed to meet the Professional Criteria for the Part 3 Examination (2010) held in common by the RIBA and the ARB. These are summarised under the following subject headings:
PC1 Professionalism
PC2 Clients, users and delivery of services
PC3 Legal framework and processes
The Professional Criteria are detailed and comprehensive and are integrated into the learning outcomes of the four core modules.

Knowledge and understanding (KU)

Upon completion of the course students will have achieved the requisite knowledge and understanding of:

KU1: **Professionalism**: The architect’s obligation to society and the profession and demonstrate overall competence and the ability to behave with integrity, in the ethical and professional manner appropriate to the role of architect.

KU2: **Clients, users and delivery of services**: The range of services offered by architects and delivering those services in a manner prioritising the interests of the client and other stakeholders. Supported by knowledge of the briefing process, forms and terms of appointment, the means of professional remuneration, relevant legislation, and the execution of appropriate programmed and coordinated project tasks.

KU3: **Legal framework and processes**: The legal context within which an architect must operate, and the processes undertaken to ensure compliance with legal requirements or standards. Supported by knowledge of the relevant law, legislation, guidance and controls relevant to architectural design and construction.

KU4: **Practice and management**: The business priorities, required management processes and risks of running an architectural practice, and the relationship between the practice of architecture and the UK construction industry. Supported by knowledge of the nature of legal business entities, office systems, administration procedures and the relevant legislation.

KU5: **Building procurement**: UK construction and contract law, construction procurement processes and the roles of built environment professionals. Supported by an understanding of contractual relationships, the obligations upon an architect acting as contract administrator, job-related administrative systems and the management of projects in the context of the candidate’s professional experience.

Specific skills (SS)

On successful completion of the course, students should be able to demonstrate the following specific skills:

SS1: **Group working**: as both leader and member in the workplace, enabling students to delegate and manage tasks and to negotiate and handle conflict effectively.

SS2: **Resources**: retrieving, prioritising and integrating relevant professional, legal and commercial sources of information.

SS3: **Reflective Practice**: demonstrating continuous personal development through structured self-evaluation.

SS4: **Management and Information**: competently undertaking tasks with minimum guidance and managing time.

SS5: **Autonomy**: working autonomously or with the minimum of guidance to investigate a range of subjects in depth and to reach a set of conclusions.

SS6: **Communication**: engaging competently in professional reporting verbally and in writing within an academic environment and to set standards.
SS7: **Problem-solving:** using creative and numerate skills to evaluate issues in a personal capacity and to make effective use of other professional resources when appropriate.

**Key transferable skills (KTS)**

The Postgraduate Diploma in Professional Practice in Architecture is designed to lead to professional registration with the ARB and membership of the RIBA. As such the course concentrates on key professional skills. These are also transferable to a number of professional and managerial contexts and also build on the transferable skills acquired by students in their qualifying undergraduate and graduate architectural programmes.

**Learning, teaching and assessment methods**

**Learning:**
The course is designed for students working in architectural practice and uses work-based learning as the core learning method.

Students are given reading lists for each module and introduced to the library and IT resources, including the University’s VLE, Blackboard.

Students are guided in the lectures and on Blackboard towards a structured approach to self-directed learning, investigation and research of the core subject areas and encouraged by the course team, through both academic study and experience, to gain the necessary level of knowledge and understanding of the subjects covered in the lecture-based modules.

Students are also encouraged to learn from experience and to reflect on their professional development through completion of the RIBA Professional Experience and Development Record (PEDR) and the application of the key subject areas in the work-based Professional Case Study and Professional Development modules. Formal and informal feedback is given on the work-based modules by the course team at regular intervals throughout the year.

**Teaching:**

1. *English Law, Regulations, Construction procurement and Contracts:* this module is delivered as a weekly lecture course by expert academic and practitioner lecturers.
2. *Architectural Practice Management:* this module is delivered as an intensive short lecture course by expert academic and practitioner lecturers.
3. *Professional Case Study:* This module combines a series of lectures with seminars and tutorials with the student’s professional tutor who is an experienced academic architect or an experienced practitioner.
4. *Professional Development and Experience:* This module combines a series of lectures with seminars and tutorials with the student’s professional tutor who is an experienced academic architect or an experienced practitioner.

**Assessment:**

The specific assessment requirements are described in the module descriptors and the criteria for assessment are related to the overall expected standard of achievement.

1. *English Law, Regulations, Construction contracts and procurement (Level 7):* 100% written ‘Open Book’ Examination
2. *Architectural Practice Management (Level 7)*: 100% written ‘Open Book’ Examination
3. *Professional Case Study (Level 7)*: 70% Coursework, 30% oral examination;
4. *Professional Experience and Development (Level 7)*: 50% Coursework; 50% Oral

**Course structure**

This section shows the four core modules that comprise the course and their credit value. Part-time Postgraduate students study 120 credits per year.

**Professional Body Accreditation or other external references**

ARB Prescription 2018; RIBA Validation 2017.

**Academic regulations**

The current Handbook of Academic Regulations is available at [westminster.ac.uk/academic-regulations](http://westminster.ac.uk/academic-regulations). In some cases course specific regulations may be applicable.

**How will you be supported in your studies?**

**Course Management**

*Alastair Blyth*, Course Leader, is responsible for the day-to-day running and overall management of the course and development of the curriculum and its delivery. Contact details: A.Blyth@westminster.ac.uk 020 3506 7329

*Professor Harry Charrington*, Head of School, holds overall responsibility for the course and other courses run by the School of Architecture + Cities within the College of Design, Creative and Digital Industries

*Professor Jonathan Stockdale*, Head of College, holds overall responsibility for the course and for other courses run by the College

*RIBA Part 3 Course Administrator*, Amanda Pawliszyn, is responsible for day-to-day administrative support for the course. A.Pawliszyn@westminster.ac.uk 020 3506 6838

**Academic Support**

Upon arrival, an induction programme will introduce you to the staff responsible for the course, the campus on which you will be studying, the Library and IT facilities, additional support available and to your Campus Registry. You will be provided with the Course
Handbook, which provides detailed information about the course. Each course has a course leader or Director of Studies. All students enrolled on a full-time course and part time students registered for more than 60 credits a year have a personal tutor, who provides advice and guidance on academic matters. The University uses a Virtual Learning Environment called Blackboard where students access their course materials, and can communicate and collaborate with staff and other students. Further information on Blackboard can be found at westminster.ac.uk/blackboard.

Learning Support

The Academic Learning Development Centre supports students in developing the skills required for higher education. As well as online resources in Blackboard, students have the opportunity to attend Study Skills workshops and one to one appointments. Further information on the Academic Learning Development Centre can be found at westminster.ac.uk/academic-learning-development.

Learning support includes four libraries, each holding a collection of resources related to the subjects taught at that site. Students can search the entire library collection online through the Library Search service to find and reserve printed books, and access electronic resources (databases, e-journals, e-books). Students can choose to study in the libraries, which have areas for silent and group study, desktop computers, laptops for loan, photocopying and printing services. They can also choose from several computer rooms at each campus where desktop computers are available with the general and specialist software that supports the courses taught at their College. Students can also securely connect their own laptops and mobile devices to the University wireless network.

Support Services

The University of Westminster Student and Academic Services department provide advice and guidance on accommodation, financial and legal matters, personal counselling, health and disability issues, careers, specialist advice for international students and the chaplaincy providing multi-faith guidance. Further information on the advice available to students can be found at westminster.ac.uk/student-advice. The University of Westminster Students' Union also provides a range of facilities to support students during their time at the University. Further information on UWSU can be found at westminster.ac.uk/students-union.

How do we ensure the quality of our courses and continuous improvement?

The course was initially approved by a University Validation Panel in 2001. The panel included internal peers from the University, academic(s) from another university and a representative from industry. This helps to ensure the comparability of the course to those offered in other universities and the relevance to employers.

The course is also monitored each year by the College to ensure it is running effectively and that issues which might affect the student experience have been appropriately addressed. Staff will consider evidence about the course, including evidence of student achievement, reports from external examiners in order to evaluate the effectiveness of the course.

A Course revalidation takes place periodically to ensure that the curriculum is up-to-date and that the skills gained on the course continue to be relevant to employers. Students meet with Revalidation panels to provide feedback on their experiences. Student feedback from previous years is also part of the evidence used to assess how the course has been running.

1 Students enrolled at Collaborative partners may have differing access due to licence agreements.
How do we act on student feedback?

Student feedback is important to the University and student views are taken seriously. Student feedback is gathered in a variety of ways.

- Through student engagement activities at Course/Module level, students have the opportunity to express their voice in the running of their course. Student representatives are elected to expressly represent the views of their peers. The University and the Students’ Union work together to provide a full induction to the role of the student representatives.

- There are also School Staff Student Exchange meetings that enable wider discussions across the School. Student representatives are also represented on key College and University committees.

- All students are invited to complete a questionnaire before the end of each module. The feedback from this will inform the module leader on the effectiveness of the module and highlight areas that could be enhanced.

- The University also has an annual Postgraduate Taught Experience Survey or PTES which helps us compare how we are doing with other institutions, to make changes that will improve what we do in future and to keep doing the things that you value.
